

**CIRCULAR Nº 25 /2018**  
Santiago, 09 de noviembre de 2018

**A** : SEÑORES ASOCIADOS Y EXPORTADORES  
**DE** : ASOCIACIÓN DE EXPORTADORES DE FRUTAS DE CHILE, A.G.  
**REF.** : EXPORTACIONES DE ARÁNDANOS A ESTADOS UNIDOS DE AMÉRICA

---

Estimados Exportadores:

Hemos estimado necesario informar a la industria exportadora de arándanos, los siguientes temas específicos relativos a las exportaciones destinadas al mercado de los Estados Unidos de América.

**PUERTOS AUTORIZADOS PARA FUMIGACIÓN OBLIGATORIA DE ARÁNDANOS EN DESTINO**

En atención a la incorporación de la nueva Región de Ñuble, (XVI Región), al listado de regiones de Chile, USDA/APHIS actualizó su Manual de Tratamientos, emitiendo la Orden Federal DA-2018-40, a través de la cual, dicha Región se incorpora a las regiones que deben cumplir como condición para su ingreso al mercado, con la realización de un tratamiento obligatorio de fumigación con bromuro de metilo, ya sea en origen o destino.

Por otra parte, USDA/APHIS señala que en consideración al volumen de arándanos arribados y la ausencia de detecciones de plagas cuarentenarias en puertos de llegada, los últimos cuatro años, los arándanos chilenos provenientes de las regiones VI, VII, VIII y XVI podrán fumigarse en origen o en cualquier puerto de arribo en USA, que cuente con instalaciones autorizadas para realizar fumigación con bromuro de metilo. Adjuntamos listado de puertos respectivos.

- **"SYSTEMS APPROACH" PARA ARÁNDANOS PRODUCIDOS EN LAS REGIONES DE BIO BIO Y ÑUBLE**

Con fecha 28 de Septiembre, el USDA/APHIS aceptó la propuesta del SAG, destinada a implementar un "systems approach" para arándanos provenientes de las regiones del Bio Bio y del Ñuble. No obstante, se deben cumplir algunos trámites administrativos para su puesta en vigencia, que contempla una notificación pública y posterior publicación de la respectiva Norma Final en el Federal Register.

Para concretar la publicación del "systems approach", USDA/APHIS ha señalado que ello se realizará considerando la aplicación de la reciente Norma publicada Q-56, lo cual permitirá la implementación de un proceso administrativo reducido, obviando de esta forma tener que cumplir con la "rule making" completa, que implicaría largos procesos administrativos y participación de distintas agencias regulatorias.

En relación a los plazos asociados a este proceso, se estima que podría estar finalizado durante el primer semestre del próximo año.

Los mantendremos informados de la evolución de esta materia.

Sin otro particular, saludamos atentamente a ustedes,

**ASOCIACIÓN DE EXPORTADORES DE FRUTAS DE CHILE, A.G.**

Miguel Canala – Echeverría V.  
Gerente General
